Subject: Cima Weekly Update

Doug,

Here is my update for this week:

This Week (11/10/14 – 11/14/14)

Ash Strategy SOQ's – Worked on draft Engineering Scope of Work for pond closures and process water setting ponds at Bremono and Possum Point (89 % complete)

Ash Pond Regulation Status – Continued working with Dave Craymer to provide review of updated language for DEQ permit – PP ABC and others.

Chesterfield U7&8 HRSG Project – Meeting with PM, Schnabel, and Irina on interpretation of Schnabel Engineering's analysis of pile capacities to withstand changed loading due to retrofit project. Still trying to make existing U7 piles work taking into account some mat bearing capacity. U8 piles OK.

Possum Point Ash Pond ABC Dam – Performed video probe inspection of outlet structure at "C" with mike W. There was no evidence of free moisture (leakage) below ash level but historical "staining" on the stop logs, either from past seepage or leakage from upper stop logs above ash level

Roanoke Rapids & Gaston Dams – Attended annual EAP training of local Emergency Management Agencies at RR.

Next Week (11/17/14 – 11/21/14)

Ash Strategy SOQ's – Work on draft Engineering Scope of Work for pond closures/process water settling ponds at Bremono and Possum.

CEC Inspection Checklist – Develop inspection checklist for ECC at Chesapeake to use for quarterly inspections

Roanoke Rapids/Gaston Dams – Work on 3rdQ 2014 instrumentation plots for submittal to FERC.

Have a good weekend!

John
